

SUDHARSAN S R

Entry-Level Full-Stack Developer | Java | Python

Email: your.email@example.com | Phone: +91-XXXXXXXXXX | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Entry-level Full-Stack Developer with hands-on experience in Java and Python development, strong knowledge of Data Structures and Algorithms (DSA), and practical exposure to full-stack web application development. Experienced in REST API development, database design, and working across the Software Development Life Cycle (SDLC) including requirement analysis, design, implementation, testing, deployment, and maintenance.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Frontend Technologies: HTML5, CSS3, React.js

Backend Technologies: Spring Boot, Flask, RESTful APIs

Databases: MySQL, SQLite, MongoDB

Data Structures & Algorithms: Arrays, Strings, Linked Lists, Stacks, Queues, HashMaps, Trees, Sorting, Searching, Time Complexity

Tools & Platforms: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code

PROJECT EXPERIENCE

FinTrack – Personal Finance Management System

Technologies: Java, Spring Boot, React, MySQL

- Developed a full-stack finance management web application using Java and Spring Boot backend and React frontend.
- Designed and implemented RESTful APIs for managing users, income, expenses, and reports.
- Integrated MySQL database with optimized queries and proper indexing.
- Applied MVC architecture and followed SDLC best practices.
- Implemented validation, error handling, and secure data processing.

Special Lab Management System

Technologies: Python, Flask, SQLite, HTML, CSS

- Built a web-based laboratory management system using Python and Flask framework.
- Designed database schema and implemented CRUD operations.
- Improved application performance using optimized algorithms and data structures.
- Worked on end-to-end development including backend logic and UI integration.

Python Data Processing Application

Technologies: Python, Pandas

- Developed a data processing tool to clean, transform, and analyze structured datasets.
- Used efficient algorithms to reduce processing time.
- Generated summarized outputs for reporting and analysis.

DATA STRUCTURES & ALGORITHMS EXPERIENCE

- Solved 160+ problems on LeetCode using Java and Python.
- Strong understanding of problem-solving, edge case handling, and algorithm optimization.

SOFTWARE DEVELOPMENT LIFE CYCLE (SDLC)

- Requirement analysis and system design
- Application development and unit testing
- Debugging and optimization
- Version control and deployment

EDUCATION

Bachelor's Degree in [Your Degree]
[Your College / University Name]

DECLARATION

I hereby declare that the above information is true to the best of my knowledge.
